

United Dairymen of Arizona's testimonial for Clear Solutions USA's Dairy Cleaner

February 5, 2012

To whom it may concern:

We at United Dairymen of Arizona have been using a built caustic cleaner for the last 2 years whose formulation was developed by Lance Renfrow and his team at Clear Solutions USA (Chandler AZ).

I have been the sanitation manager for UDA for the last 11 years, and before that I worked for Carnation Dairies since 1974. Over my time being involved with sanitation, I have worked with Ecolab, DeLaval, Shepherd Brothers, Thatcher, Texo, Nalco, Univar, and Brenntag --- using their chemicals for cleaning.

The Clear Solutions formula has been the best cleaning chemical I have ever used. Here at this plant in Tempe, Arizona, we use it at different strengths for lines, silos, tankers, HTSTs, evaporators and membrane systems. This product will reduce post-rinse time, scale build-up, chemical residue, and will eliminate milk stone. The chemical make-up reduced the actual cost to clean by 20%. This chemical works best if one follows Clear Solutions' guidelines. Under certain conditions, the amount of material used will decrease and chemical cycle times can be reduced by two-thirds.

Michael Prince
